Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A portable telephone device which is configured to be in an opened state and in a closed state comprising:

(a) a first memory part for memorizing an incoming call history data including at least one incoming phone number which identifies a source of an incoming call;

(b) an open/close detector for detecting the opened state and the closed state of the portable telephone; and

(c) a second memory part for storing telephone directory data, the telephone directory data including at least one phone number to be automatically dialed;

(~~ed~~) ~~a phone number comparison part for recording a phone number to be automatically dialed and for comparing the at least one incoming phone number in the~~ first ~~memory part with the at least one phone number to be automatically dialed~~ stored in the second memory part,

(~~ed~~) an automatic dialing part for automatically dialing the at least one incoming phone number when the open/close detector detects that the portable telephone has been opened after the incoming call is terminated, and when the phone number comparison part confirms that the one of the incoming phone number in the memory part is identical to the phone number to be automatically dialed.

2-5. (Cancelled)

6. (Previously Presented) The portable telephone device according to claim 1, further comprising a display part for displaying the at least one incoming phone number.
